DETAILED ACTION

EXAMINER'S AMENDMENT

1. Authorization for this examiner's amendment was given in a telephone interview with Daphne Fickes on 07/08/2004.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: the phrase "the first infrared detector" in line 13 of claim 13 has been changed to --the infrared detector--, in order to remove a possible 35 USC 112 lack of antecedent basis rejection (there is only one infrared detector claimed, therefore no need for a claim to a "first detector").

Allowable Subject Matter

2. Claims 1-22 are allowed.
3. The following is an examiner's statement of reasons for allowance: There is no evidence in the prior art searched of an apparatus and method for sensing the concentration of methanol in aqueous solution in a fuel circulation loop of a direct methanol fuel cell (DMFC) with the infrared detectors and method steps as claimed. Prior references disclose detecting the methanol concentration in DMFCs using ultrasound detection or open voltage circuit methods.

Art Unit: 2878

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
